## Digital Tour Guide System and Conference System

MODEL: 085 model

### Simple use steps

Thank you for purchasing “085” Digital team on tour. This simple manual describes the various functions of this tour guide allows you to operate freely and fully experience the tour guide to bring you the convenience, please read this manual carefully before use.

### USE STEPS:

1. Turn on the Tour guides (Transmitter and Receivers). This Transmitter is same design with the Receiver for our model.
2. Insert the MIC and Earphone to the Tour guides’ “output” tightly.
3. The LCD panel will display the volume number on the left side and display channel number on the right side. For Transmitter which display from “0-4” for volume. For Receiver which display from “0-9” for volume. Their channels are both 100 channels.
4. Just press “v” or “A” to adjust the “volume” for Transmitter and Receiver.

### The volume of Transmitter feature

Volume number of Transmitter is from “1-4”, volume number of Receiver is from “1-9”.

5. If the Guide need adjust the “channel”, customers just press “FUN” and “V” together, then you can see “ch” twinkles, then just press “A” or “V” to select the channel which you like. Just make sure the channel is same as Transmitter and Receiver. (Use step is same as Transmitter and Receiver.)

6. This model has record function.

Just press “FUN” key with several seconds on Transmitter, then will see “\_ \_”, at this time, Guide can speak some words to record. When no need record, then loose this key.

Generally these Tour guides can record 15 seconds.

7. Under the Receiver normal working mode, if it does not receive the signal (Transmitter stops transmit signal, or too far) more than 20 seconds it will automatically warm sound “please follow up” 3 times and more than 3 minutes into power-saving model.

In this model, when it receive signal it will exit the power-saving model and return to normal receive state.

8. Regarding charging.

When charge these Tour guides, the led light will be red color.

After finish the charging, the led light will put out. No led color displays.
