Optimised performance, cost-efficiency and easy installation

DBD Series digital signage offers you a winning combination of cost-efficiency, ease of installation and optimal performance that enables you to be more productive. The embedded all-in-one 2nd Generation Samsung Smart Signage Platform (SSSP) boosts power and capacity while providing user-friendly content management. Without the need for external media players or PCs, the deployment process is streamlined, saving you time and resources. You can conveniently install this wireless, lightweight digital signage with narrow bezels for an impressive, modern look and clear message delivery 16/7 on bright, 350-nit screens.

Simplify content delivery with a hassle-free all-in-one solution

Improve productivity and reduce operating costs by installing and configuring the signage solution with greater ease. The embedded, all-in-one 2nd Generation SSSP eliminates the need for a separate PC or media player to streamline digital signage operation and improve TCO. To boost efficiency, content deployment and sharing is simplified with a PC-less network connection that lets you plug in a USB and link multiple displays over a daisy chain configuration.

Accelerate business performance with advanced 2nd Generation SSSP

DBD Series digital signage is powered by a significantly upgraded embedded 2nd Generation SSSP. The new quad-core SoC processor substantially improves performance with a remarkably faster processing speed for rich, seamless messaging. The increased power supports interactive digital signage capability that is available for all sizes through an optional Touch Overlay. This innovative feature amplifies your messaging with engaging interactivity, without the need for an additional PC. Now, schools, corporations and other businesses can offer interactive signage with less expense and difficulty. In addition, the 2nd Generation SSSP supports a picture-in-picture (PIP) size over 50 percent of the digital signage area for operational excellence, compared to less than 50 percent in dual-core digital signage.

Easily manage digital signage with a simplified Home UI, tools and templates

Experience intuitive, touch-friendly control of digital signage functions with a newly designed Home screen user interface (UI). Frequently used functions are conveniently available on the Home screen in a new matrix design represented by large menu buttons for ease of use. A selection of menu configurations is also displayed on the Home screen, which can be customised to populate repeatedly used menus instead of using the default selection, for quick access. With the addition of the optional Touch Overlay, the Home UI turns into a touch-activated user experience.

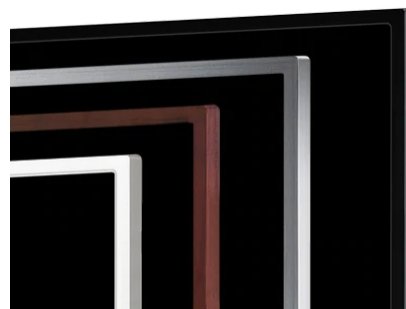

DBD Series digital signage also provides powerful content management tools, upgraded for your business use. Features include:

* **Multi-channel scheduling.** Deliver various scheduled content on

Manage digital signage wirelessly virtually anywhere, anytime on a mobile device

With a convenient Wi-Fi dongle option, users can control and wirelessly distribute content to the digital signage solution using mobile devices for convenient content management. The ability to send and schedule content from a mobile device, instead of locating a PC that is connected to the digital signage or finding suitable cable connections simplifies display management.

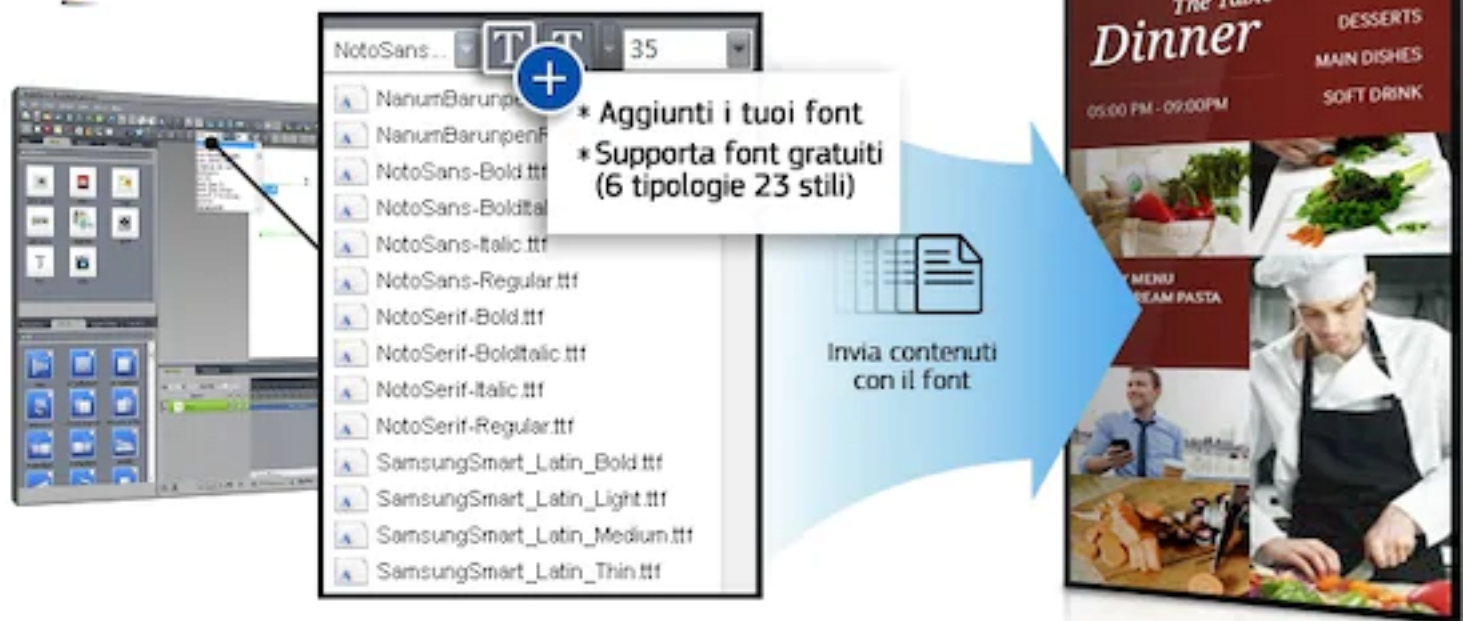

Create a stylish décor with sleek digital signage featuring custom colourization

Enhance the ambiance of your business environment while elevating your brand image with the DBD Series digital signage sleek, cutting-edge design. The stylish digital signage features ultra-narrow 9.5 mm (0.37 in) slim bezels in matte black, black hairline, wooden or titanium deco bezels that can be installed as options to match any décor. A 49.9 mm (1.97 in.) profile and invisible tag-style logo also ensure that the digital signage perfectly complements your interior design.
